on Operational Mission to Merseburg, Germany 2 November 1944.

The second turn to the right after leaving the target at Merseburg,
on 2 November 1944, I saw the ship flying lead in the low low element of
the 603rd Squadron hit by 20 MM shells from fighters. The left horizontal
stabilizer was badly checked up and burst into flame almost instantly.
Our plane nearly collided with the burning ship as it slid under our nose
and disappeared from my view. I could not see the fighter or fighters which
hit this plane.

Shortly after Bombs Away Lt Reed's aircraft was hit in the number two engine by a burst of flak starting a wing fire. The plane pulled out of the element formation and passed under the formation and down out of my view to the left. His wing was burning badly at the time he pulled out of the formation.

Several minutes later Lt Newman's aircraft was hit in the tail section and left wing by 20 MM cannon fire from a German fighter plane. A severe wing fire developed under the left wing and behind the number one engine. Newman's ship pulled up and over the element formation. He also was burning badly at the time.

I lost sight of both planes for a few minutes. I then saw one of them at a considerable distance below our formation. I saw four men leave this plane and drop away. Their parachutes did not open while I was watching. I am not certain which of these airplanes the crew members were leaving. It was too far away for me to identify the markings.

Statement Concerning Missing Aircraft B17G 42-302832, Pilot, 1st Lt Herbert H Newman, O-1291518, 603rd Bomb Squadron, 398th Bomb Group EV on Operational Mission to Nuremberg, Germany 2 November 1944.

I was flying as tail gunner on Lt Hunt's crew. About two or three minutes after bombs away, someone yelled over the VHF that M-Mike was on fire and to bail out. Our pilot pulled out of formation a little to the right and I heard him tell our ball turret gunner to check the engines underneath to see if we were on fire. The ball turret gunner reported that there was no fire, so it must have been another M-Mike. Before we could get back in formation four ME-109's headed for our formation from the rear. Two broke off below us and two attacked. I started following the two that had gone below us. They were headed for the rear of our low group along with another ME-109. There were five or six ships in the low group that I could see before they were hit. I saw no fire on any of these ships before the fighters hit them.

The lead ship of the rear element was hit in the left wing at about number two main gas tank. Immediately fire flared out of the wing at this point, but the wing didn't blow up. The ship peeled off to the left and was still under control the last time I saw him. I did not see any chutes.

on Operational Mission to Herseburg, Germany 2 November 1944.

I was flying Ball Turret in Lt Lee's ship. I saw one FW 190, come from
the rear and attack Lt Reed's ship (# 2 in rear element) this was the first
attack. I saw Lt Reed leave the formation but my attentions were then
diverted elsewhere.

Shortly after I saw a FW 190 approached the rear element from the rear.
The attack on them lasted approximately thirty seconds and at the end Lt
Newman's number two engine was afire. He left the formation and did a 180°
to the left losing altitude at the same time. I observed his descent until
he went thru the cloud and up to that time I saw four chutes come out and
open. The ship was still under control. Lt Newman was the second to leave
formation because of enemy fighters.

Statement Concerning Missing Aircraft B17G 42-102562, Pilot, 1st Lt
Herbert E Newman, O-1291518, 603rd Bomb Squadron, 398th Bomb Group
Bv on Operational Mission to Merseburg, Germany 2 November 1944.

I was flying Ball Turret on Lt W. M. Johnson's crew on 2 November 1944. About two or three minutes after Bomb Away I heard over the interphone that a Plane was on fire behind us. I turned around and saw it at 7:00 o'clock. The numbers two engine was all ablaze. I think the tank was on fire also. My bombardier called me and told me to see how many chutes came out. I saw six chutes come out at a level about two thousand feet below us. One chute opened just above the clouds.

Just after this I heard our tail gunner, Sgt Lescale, report that there was some fighter activity in the squadron behind. About a minute after this as we were in a shallow left turn, my bombardier, Lt N. A. Robinson reported that a plane was in a flat spin just to the left of us. I watched it until it went into the clouds but could see no chutes.

About a minute later the bombardier called up and reported a plane burning in a dive from what could have been our high group. The crew in the nose and cockpit saw it explode once -- then dive on further then explode again and disappeared a mass of flames into the clouds. I followed it down a considerable distance myself and saw no one leave the plane.
